

Your Complete 4wd Storage Solution!

ORS Security Box

Ever heard the phrase “out of sight, out of mind”? This is the theory we went with when designing our Security Box.

Designed to fit between the back of the drawers and the back seat this box fills a gap that is notoriously tricky to fill. The box sits flush with the top of the drawers, so it is nearly invisible.

To access the box all you need to do is fold the top half of your rear seat down and open the door. The door faces forwards, pressed against the back of the seats, so that no one can see that it even exists.

The box is shaped so that it has the maximum capacity without impeding on the seats, so you can fit plenty of gear

in it. It is the perfect place to hide cameras, phones, GPS units and CD's as well as larger items such as tripods and laptop computers, especially if you need to leave the car for any length of time.

Handy both in the bush, as well as around town.
